## **Barts Cancer Institute, human error is worldwide.**

**But did you know you can eliminate error in genotyping  
with an outsourced, automated solution?**

Labs that are genotyping manually could be performing research on non-viable subjects. Automated genotyping from Transnetyx is 99,97% accurate on over 20 million samples. With our proven process, your results are guaranteed in 72 hours or less from the time we receive your samples.
